

Freilassing Locomotive World

The Freilassing Locomotive World opened in 2006. With its outstanding locomotives it is a first class museum in the Berchtesgadener Land district.

The fundamental features of the "Freilassing Locomotive World" museum are the authentic, listed roundhouse (locomotive shed) on the one hand, and the valuable locomotives on loan from the Deutsches Museum on the other. The exhibition building and the exhibits are a perfect match.

A programme of regular high-quality events ensures that even those who already know the Locomotive World are always attracted back to the museum.

ALL ABOARD!

Come and take a look, and let yourself be carried away by the charms of 150 years of railway history. You are very welcome!
